Important Note

As of March 1, 2014, J-Reporter replaces "Certifier40G Reporter".

Test data from device firmware v6.0.x and beyond is not supported by, or compatible with, v5.1.33 or previous versions of "Certifier40G Reporter"

Please use the new "J-Reporter" PC Software for Test Data management for devices running v6.0.x or later.

Please continue to use "Certifier40G Reporter" for Test Data management for devices running v5.1.33 or earlier

"Certifier40G Reporter" and "J-Reporter" can both be installed and run at the same time on a PC.

It is recommended that if you are in the middle of a job using v5.1.33 or earlier, that you complete the job using that firmware and "Certifier40G Reporter" PRIOR to updating to "J-Reporter" and v6.0.x
